

**In the Claims:**

No amendments to the claims have been made in this response. The following listing of claims is provided for convenience.

1. – 16. (Canceled)

17. (Previously presented) A computer implemented method of generating a document, where one or more computers are programmed to perform steps comprising:

receiving a document template;

receiving content data;

combining the document template and the content data to generate a document;

publishing the document to a current location;

identifying a current relative uniform resource locator (URL) in the document;

identifying a new relative URL corresponding to the current relative URL in the document;

modifying the document based on the new relative URL to generate a modified document; and

publishing the modified document to a new location.

18. (Previously presented) The method of claim 17, wherein the content data is received through a second user interface having functionality defined by a first user interface.
